OBJECTIVE

Computer Science undergraduate (4th semester, UMT Lahore) with hands-on internship experience building real-world web applications using Next.js, TypeScript, and Supabase. Strong foundation in object-oriented programming and data structures, with practical exposure to modern development tools and AI-assisted workflows (Claude AI, Cursor AI). Seeking a Software Engineering or Backend Development internship to further apply and grow these skills.

EDUCATION

BS Computer Science — University of Management and Technology (UMT), Lahore 2024 – Present

CGPA: 3.21 / 4.0

Relevant Coursework: Object-Oriented Programming · Data Structures & Algorithms · Database Systems · Computer Networks · Computer Architecture · Theory of Automata

INTERNSHIP EXPERIENCE

Web Development Intern — Dafi Labs

- Contributed to a real-world, production-facing web application built with Next.js and TypeScript, developing features in a modern, type-safe codebase.
- Built and enhanced responsive, reusable UI components using Tailwind CSS, improving consistency and usability across the application.
- Integrated Supabase for backend services, including database operations and user authentication.
- Implemented transactional email functionality using Resend to support core application workflows.
- Leveraged Claude AI and Cursor AI to accelerate development, assist with debugging, and optimize code quality.
- Used Git and GitHub for version control, branching, and collaborative code management within the team.
- Identified and fixed bugs, tested new features, and contributed to improving overall application performance and reliability.
- Participated in an Agile workflow, including daily stand-ups, code reviews, sprint demos, and team discussions.

TECHNICAL SKILLS

Languages: C++, TypeScript, JavaScript, HTML, CSS

Frameworks & Libraries: Next.js, Tailwind CSS

Backend & Databases: Supabase, MySQL (Basics), Resend (Email API)

Tools & Platforms: Git, GitHub, Cursor AI, Claude AI, VS Code

Core Concepts: Object-Oriented Programming, Data Structures & Algorithms, RESTful APIs, Agile Development

Languages Spoken: English (Professional), Urdu (Native)

PROJECTS

Loan Management System — C++ · Object-Oriented Programming

Designed and developed a console-based loan management application to handle borrower records, interest calculation, repayment tracking, and report generation. Applied object-oriented design principles, encapsulation, and file handling to build a modular and maintainable C++ codebase.

Restaurant Management System — C++ · Data Structures

Built a menu-driven restaurant management application using linked lists and queues to handle orders, table management, and billing. Implemented core data structure concepts to ensure efficient, real-time order processing.

Tic Tac Toe Game — C++ · Programming Fundamentals

Developed a two-player console-based game featuring win detection, dynamic board rendering, and a replay option to reinforce core programming fundamentals in C++.
